The utility industry has lots of job openings, and the demand for trained workers will continue to grow for years to come. The job is really flexible, so it’s easy arranging time off and vacation time. Electricity is needed everywhere, so you can usually choose where you work and what you do.

In the power industry I get to run large, complex machines. Sometimes these machines break down or won’t operate properly. Figuring out these problems with knowledgeable coworkers is inspiring and motivating, which makes me look forward to coming to work each day.

Customers are always happy to see me when there’s a problem. They’re really appreciative when I get the power back on. I feel like I make a difference in people’s lives when I’m working on the system.
